

## **LOVELLS SPRINGS & SUSPENSION – AS AUSSIE AS THEY COME !**

Lovells Springs founder George Lovell, began his own company with his three sons in Sydney way back in 1930. George and his sons manufactured their own spring making equipment including furnaces and forming equipment and as a result of hard work, Australian ingenuity and determination the business flourished. Lovells Springs & Suspension has long since cemented their reputation as a world leader, manufacturer and supplier of premium quality springs, shocks and suspension components to suit a broad range of applications for automotive, 4x4, agriculture, mining and Aussie railway industries.

Lovells Springs & Suspension is now in its 79th year of business as a manufacturer and supplier of premium quality springs, shocks and suspension components. The company, has built an enviable reputation worldwide as a specialist Australian manufacturer to bring you a range of suspension products that offer you **"The Ride of your Life"**

## **LOVELLS GAS LEGEND 'Series III' SHOCK ABSORBERS**

( photo )

The latest Lovells Series III Gas Legend Twin-Tube Gas Charged shock absorbers have been introduced to replace their Series II shocks and introduce another level of performance than many other shocks offered within \$500.00-\$700.00 per set of 4, of this product's price position.

The new Series Iii Gas Shocks now have a 40mm bore and huge 60mm expanded body design which provides up to twice the oil capacity of Original Equipment shock absorbers

to maximise fade resistance, run cooler and allow faster reaction time to road changes. A High Quality Piston reduces heat build-up within the shock for extra durability.

The Piston retainer nut is mechanically peened to stop any possible failure at high temperatures. Aussie engineered, Multi stage valving systems allow a progressive dampening effect from slow to fast piston velocity thus automatically adjusting to all road and track conditions.

Piston Rods/Shafts are manufactured from tough 20mm hardened, chromed steel and are precisely engineered to withstand the harshest of environments, while reducing friction and wear. Piston rod seals are high quality, high temperature multi-lip design to again reduce friction and provide longer life. Robust external tube walls and internal walls offer extra durability in the harshest, rocky conditions.

Gas charged with low pressure nitrogen gas to maximise fade resistance under extreme conditions without ride harshness while providing a more responsive control. All eyes and pin mounts are fully welded for extra strength and longer life.

The majority of the range are Long Travel Designs to allow fitment with all Lovells spring part numbers and ensures maximum wheel contact at all times.

We offer a full **3 year / 70,000km warranty** on all the Lovells Gas Legend Series III Shock Absorbers we sell.

**In over 30 years in the 4WD & Suspension industry, selling just about every brand in that time, we have found the performance, ride and durability of these shocks to be the best value for money shock absorber that we have ever sold in the mid priced shock absorber range and are confident that they will suit many of our customers**

The Lovells Gas Legend range includes the most common type Telescopic shocks, the new Coil-Over shocks of later model IFS coil spring designs and a range of complete replacement Strut type shock absorbers for many popular 4WDs and AWD vehicles.

## **Features**

- A large 40mm Big-Bore Twin tube design – across the entire shock range
- 20mm Hardened Chrome plated piston rod
- 60mm Outer tube / body casing (where vehicle space / design permits)
- High Quality Piston – to greatly reduce heat build-up
- High temperature fluid
- High quality Multi-Lip seals
- Low pressure Nitrogen Gas Charged
- Internal mechanical top-out stops
- Aussie engineered, multi-stage, velocity sensitive valving
- Additional supplementary welds on all studs and eye ring mounts
- Durable inner and outer Twin Tube design
- 3 YEAR / 70,000k WARRANTY !
