

DURASHOCK GAS SHOCKS – AS PREVIOUSLY SUPPLIED TO LOVELLS SUSPENSION and ALSO SUPPLIED TO MANY MINING & EXPLORATION COMPANIES FOR OVER A DECADE or MORE.

We are excited to be able to continue to sell these excellent Value for Money, Durable, Quality Shock Absorbers to our customers after more than 10 Years as one of our best-selling 4x4 Shocks.

These are the very same shocks we have sold previously as our LOVELLS GAS LEGEND 'Series II' SHOCK ABSORBERS since June 2008.

There's only one reason we would continue with this product for so long. It offers the best value for money for such an economical price and with great warranty as well – a whopping **3 YEAR / 60,000K** to the original purchaser.

The DURASHOCK Twin-Tube Gas Charged shock absorbers offer a higher quality and level of performance than most other shocks offered within \$450.00-\$500.00 per set 4, price point.

The DURASHOCK Gas Shocks have a 36mm bore and huge 60mm expanded body design (where space permits) which provides up to twice the oil capacity of Original Equipment shock absorbers to maximise fade resistance, run cooler and allow faster reaction time to road changes.

A Teflon banded steel piston greatly reduces heat build-up within the shock and a Nylon mechanical top-out stop protects the top seal for extra durability. The Piston retainer nut is mechanically peened to stop any possible failure at high temperatures.

Aussie engineered, Multi stage valving systems allow a progressive dampening effect from slow to fast piston velocity thus automatically adjusting to all road and track conditions. Piston Rods/Shafts are manufactured from tough 18mm hardened, chromed steel and are precisely engineered to withstand the harshest of environments, while reducing friction and wear. Piston rod seals are high quality, high temperature multi-lip design to again reduce friction and provide longer life.

Robust 2mm thick external tube walls and 2mm thick internal walls offer extra durability in the harshest, rocky conditions.

Gas charged with low pressure nitrogen gas to maximise fade resistance under extreme conditions without ride harshness while providing a more responsive control.

All eyes and pin mounts are fully welded for extra strength and longer life.

The majority of the range are Long Travel Designs to allow fitment with all Lovells spring part numbers and ensures maximum wheel contact at all times.

We offer a full **3 year / 60,000km warranty** on all the DURASHOCK Gas Shock Absorbers we sell.

In over 30 years in the 4WD Suspension industry, selling just about every brand in that time, we have found the performance, ride and durability of these shocks to be the best value for money shock absorber that we have ever sold in the mid-priced shock absorber range and are confident that they will suit 85-90% of our customers

The DURASHOCK range includes the most common type Telescopic shocks, the new Coil-Over shocks of later model IFS coil spring designs and a range of complete replacement Strut type shock absorbers for many popular 4x4 vehicles.

FEATURES

- A large 36mm Big-Bore Twin tube design – across the entire range
- 18mm Hardened Chrome plated piston rod
- 60mm Outer body casing (where vehicle space / design permits)
- Teflon banded Steel piston – to greatly reduce heat build-up
- High quality, high temperature hydraulic fluid
- High quality Multi-Lip seals
- Low pressure Nitrogen Gas Charged
- Internal mechanical top-out stops
- Aussie engineered, multi-stage, velocity sensitive valving
- Additional supplementary welds on all studs and eye ring mounts
- 2.5mm wall thickness on both the inner and outer Twin tubes
- 3 YEAR / 60,000k WARRANTY !

Please use the "Shop By Vehicle or Search for Product" links on our Home Page for your application.

In the more than 20 years that we have been selling 4WD Suspension products - we have sold many different brands of shock absorbers for all types of vehicles while working for different organisations. Including brands like: Old Man Emu Nitrocharger, Ultimate, Rancho, Series 2000, XGS, Cofap, Pedders, EFS Enforcer, EFS Elite, Sachs, Boge, Monroe, Dobinson, Desert Fox, Raw 4X4, KYB, Tokico, Bilstein and Koni along with a number of others over that time and in our opinion, we can honestly say that the 'DURASHOCK Gas Shocks' offer the best value for money of any shock absorbers within the mid-ranged price bracket, to suit around 80% of all on and off-road driving conditions and requirements.
